Securing Your Business

BIZSECURE delivers a comprehensive suite of reputable, state-of-the-art and award-winning Security Solution. These solutions are developed to protect your organization's IT & OT assets

Stormshield is a European leader in providing NG UTM Firewall, Data and Endpoint security. As a wholly-owned subsidiary of **Airbus Group**, it offers smart, capable and connected solutions to anticipate and protect against forever evolving digital threats.

Logpoint provides modern **SIEM**, **SOAR** and **UEBA** solutions to security teams of any size and in any industry to efficiently improve your security posture. To assist in battling threats, security functionality in **Logpoint** is closely connected to the **MITRE ATT&CK** framework.

Seclab Secure Exchange Network (SXN) allows bidirectional communication via TCP/UDP protocol between IT and OT environment while ensuring security by sanitizing the datagram.

Gatewatcher is an APT Detection solution by harnessing the unique Trackwatch technology, which identifies and detects all existing and unknown threats via real-time network traffic inspection.

Wallix Privileged Access Management (PAM) solution ensures you can control, manage and monitor your privilege access of your IT Admins to the servers and network devices.

Ubika Web Application Firewall (WAF) protects your business critical web apps and API against exploits, cyber threats, known and unknown attacks including OWASP top 10

HAProxy is the software-based high-availability, **load-balancer** and **application delivery controller** to ensure the continuity of your web service.

KUB is an analysis and decontamination solution for **USB devices**. It allows you to protect your computer from infections included in a **USB device**.

Seamless Authentication
Make life easy for your **workforce** by giving them access to their applications as smoothly as possible. Use **SSO** and **Federated Identification** so they can move through application. Impose **MFA** for access to sensitive data.
