

# Bringing \*clarity\* to cyber vulnerability chaos.

Hackuity offers unified management of your cyber exposure, by interconnecting all the security tools deployed in your organisation.

## Reduce the noise

Hackuity centralises, normalises and de-duplicates all your vulnerability feeds, and prioritises based on the reality of the threat.

÷38 the number of Critical Vulnerabilities with the True Risk Score (TRS). Remediate the real threats.

## RIP manual processing

Hackuity automates remediation by synchronising all your security tools: scanners, pentests, CMDB, ITSM, DevOps, IM, and more.

70% of vulnerability-related tasks can be automated to cut remediation time..

## Break security silos

Hackuity aggregates security metrics and provides a unified, reliable dashboard to drive compliance and security posture.

50+ connectors to orchestrate your tools: unification, speed and precision.
