

# Comprehensive Cybersecurity Services for SMEs

## Why Heron

Trusted and reliable managed security services curated to meet the needs of SMEs

### Expertise

Deep subject matter expertise in regulations, standards, frameworks and technologies

### Experience

Decades of military and Government security experience, defending against sophisticated threats

### Credentials

Licensed, accredited and certified by Singapore authority and international bodies

# Meeting Your Needs

## Increasing cybersecurity compliance

Our consultants will advise you on security governance, regulatory and compliance matters so that you can focus on your core business activities.

## Lack of cybersecurity expertise amidst complex threats

Our specialists will ensure that you have the required cybersecurity protection, aligned with compliance requirements and risk appetite.

## Lack of resources to provide continuous protection

Our SOC in Singapore will monitor your networks, endpoints, email and data movement and respond against ever changing threats daily.
