NETTITUDE

AN **LRQA** COMPANY

Company Overview

NETTITUDE R&I
RESEARCH AND INNOVATION
Nettitude has a dedicated and focused team of vulnerability researchers that work with our partners to identify security vulnerabilities in hardware and software devices.

We regularly identify vulnerabilities in applications, embedded devices and IoT technology. We have identified many unique zero-day vulnerabilities in a range of technology applications and platforms, and our team of researchers has been assigned many unique CVE numbers for their work.

CREST

VA | PEN TEST
STAR Intelligence-led PT | STAR Threat intelligence | CSIR | SOC

We are proud to be one of a handful of companies worldwide that are certified by CREST across all of their key disciplines. Our team of consultants have achieved the highest accreditations for Penetration Testing, Red Teaming, Incident Response Services and Threat Intelligence. In addition, Nettitude is an accredited ASSURE Cyber Supplier for the Aviation industry.

NCIRT
CYBER INCIDENT RESPONSE TEAM

If you experience a security incident at your organisation and are looking for immediate assistance with Incident Response, Nettitude has a team of highly trained, CREST certified incident responders in the UK and US ready to help you investigate and recover your business.

PCi Security Standards Council™
QUALIFIED SECURITY ASSESSOR

Nettitude is certified by a range of governing bodies for our work within highly regulated industries, including the financial and payment card sectors and is approved as a Qualified Security Assessor (QSA) and PCI 3DS, PCI ASV and ISO 27001 Lead Auditor.

SOC
SECURITY OPERATIONS CENTRE

Nettitude has been delivering Managed Security Services globally since 2003 and was the first organisation to be accredited by CREST for our Security Operations Centre. We provide both proactive and reactive services through our team of highly skilled consultants, including global security and network operations, 24/7 logging, collection and support, and industry reports from our research and innovation team.

01 Nettitude... your trusted cybersecurity partner

At Nettitude, we are passionate about cybersecurity and managing cyber risk – keeping your data and your business secure and protected at every stage of its journey. We aim to be your trusted cybersecurity partner.

Founded in 2003, Nettitude is an award-winning provider of cybersecurity services, bringing innovative thought leadership to the ever-evolving cybersecurity marketplace. Leveraging our tenacious curiosity, we aim to operate at the forefront of the industry. Through our research and innovation centres, Nettitude provides threat led services that span technical assurance, consulting and managed detection and response offerings.

We are driven by a desire to build and deliver the best cybersecurity propositions in the industry and stay abreast of the evolving legislative and regulatory cybersecurity landscape. This helps our clients to prioritise their cybersecurity risks, enabling them to focus on the activities that are core to their business.

We provide pragmatic cybersecurity for industries such as finance & banking, IT, technology & engineering, maritime, retail, healthcare, manufacturing, and critical national infrastructure.

Please contact one of our consultants to discover how we could become the trusted cybersecurity partner for you and your company.

02 What Does Nettitude Offer?

Nettitude is an award-winning provider of cybersecurity services, bringing innovative thought leadership to the ever-evolving cybersecurity marketplace. We operate a wide range of services under the following six key areas:

1: Penetration Testing

As a leading penetration testing company, Nettitude holds the most coveted accreditations across the world. Most of Nettitude's security consultants hold OSCP, OSCE, CREST certified Infrastructure Tester (CCT Inf), CREST certified Web Application Tester (CCT App) and CREST Registered Tester (CRT) certifications, as well as CREST CCSAM and CCSAS red teaming qualifications. Nettitude regularly provides penetration testing for leading global businesses as well as government organisations, and we have a robust testing methodology that extends across infrastructure and application testing engagements. Although every penetration test is tailored to our clients' individual needs, we follow the same proven methodology so as to maintain a consistent and reproducible set of results. We offer:

- Web App Testing
- Infrastructure Testing
- Wi-Fi Testing
- Mobile Device & IoT Testing
- CBEST & STAR Testing
- Cloud Service Testing
- Code Review Services
- Firewall Security Testing
- Red, Blue & Purple Teaming
- SCADA & ICS Testing
- Social Engineering
- ASV Services

2: Security and Risk Consulting

We advise our clients on how to address information security, risk and compliance needs to identify vulnerabilities and assess technology and business risk to meet compliance mandates such as PCI DSS, GDPR, ISO 27001 and more. Our security consultants hold CISA, CISM, ISO27001 Lead Auditor and CISSP qualifications, among others.

Our approach helps organisations achieve these mandates in an efficient manner, minimising their risks of a cybersecurity breach. In addition, we help organisations make informed decisions on how to allocate resources to manage information security risks and compliance. Doing this against client business requirements and objectives ensures a customised and workable solution. We offer Security and Risk Consulting around:

- DPA & GDPR Guidance
- ISO 27001 Implementation & Support
- Cyber Essentials
- Cybersecurity Reviews and Strategic Guidance
- Governance & Oversight
- Virtual CISO
- Risk Management
- Security Awareness Training
- Security Policies & Procedures

3: PCI DSS Compliance Services

PCI DSS is a set of requirements for payment account data security and is vital if you handle any sort of credit card data within your organisation. Our range of experience, accreditations and client testimonials demonstrates why we stand out from the crowd. Nettitude is one of the most experienced organisations in the world for PCI compliance consulting, auditing and pragmatic security solutions. We offer:

- PCI DSS Gap Analysis
- PCI DSS Maintenance & Support Services
- PCI DSS Audit & Certification
- PCI DSS Policy & Procedure Creation
- PCI DSS Training
- PCI DSS ASV Scanning

4: Incident Response

Nettitude has been delivering cybersecurity services since 2003 and delivers Managed Security Services (MSS) globally. We deliver both proactive and reactive services through our team of highly skilled consultants and through our advanced Managed SOC Services.

SOC-as-a-Service Nettitude's Managed Services Offering: Whether you require a SIEM solution or a combination of tools and services to protect your entire organisation, Nettitude's SOC-as-a-Service can be customised by selecting service components suitable to protect your environment and critical systems.

Nettitude's SOC as a service utilises leading security technology vendors, combined with automation and orchestration to deliver a robust and comprehensive Managed Security Service offering to suit your needs. The flexible and component-based offerings can be selected or added to as your cybersecurity maturity evolves.

5: Incident Response

If you experience a cybersecurity incident and are looking for immediate assistance with incident response, Nettitude has a team of highly trained CREST certified incident responders ready to help you investigate and recover your business. We offer:

- IR Management
- IR Testing
- IR Maturity Assessment
- IR Compromise Assessment

6. Security and Network Solutions

Security and networking projects can be challenging. Nettitude helps organisations to establish a security roadmap and strategy, whilst removing some of the typical barriers and challenges that prevent an organisation from running smoothly during any transformation process. From initial design, to delivery and ongoing maintenance, we can deliver scalable and appropriate solutions to fit the current security landscape and reduce the risk from cyber threats. Solutions include:

- Network, Security and Cloud consultancy
- Close partnerships with market-leading cybersecurity vendors
- Cloud Security solutions
- Emerging technology
- LAN, WAN and WLAN Enterprise solutions
03 Threat Intelligence-led Cybersecurity

Nettitude believes that a holistic approach to security is needed. Knowing that you are protecting assets of value, and ensuring you have the right controls in place to address the risk, is a vital first step.

Swamped in indicators saying you are under attack? We believe threat intelligence data feeds are best left to automation in your firewalls and IPS/IDS. Our Cyber Threat Intelligence services are delivered by real-life humans, as our CREST certified team of analysts produce actionable cybersecurity intelligence information specific to your organisation.

Threat Intelligence-led testing allows you to fully understand the threats that are out there, ready to attack your organisation at any given time. If you can understand the threats, you can understand how they work and put people, processes, and technology in place to prevent them from gaining access to your networks and data.

Once you have secured your assets, you need to verify the protection through appropriate testing and simulation.

A process of improvement, governance and change management will provide ongoing confidence in your controls while a proactive monitoring and response mechanism allows you to deal with events and suspected breaches as they occur.
