NEXUSGUARD ®

Simplifying DDoS for Communications Service Providers

Nexusguard's technologies and services are built for Communications Service Providers (CSPs) dealing with the impacts triggered by cyber attacks, or seeking to add advanced cybersecurity capabilities to their product portfolio.

DDoS Protection

### On-premise Bastions Server and Service

Nexusguard Bastions server is a powerful, versatile "cloud-in-a-box" deployment that seamlessly integrates Nexusguard's proprietary technologies and global cloud scrubbing into a modular chassis built into the CSP's environment.

- Bastions Server
- Clean Pipe
- Network Protection

Managed Cloud Based Protection

leveraging on our highly scalable, fully redundant and globally distributed scrubbing network to mitigate the largest and most sophisticated DDoS attacks.

- Application Protection
- DNS Protection
- Edge Protection
- Origin Protection
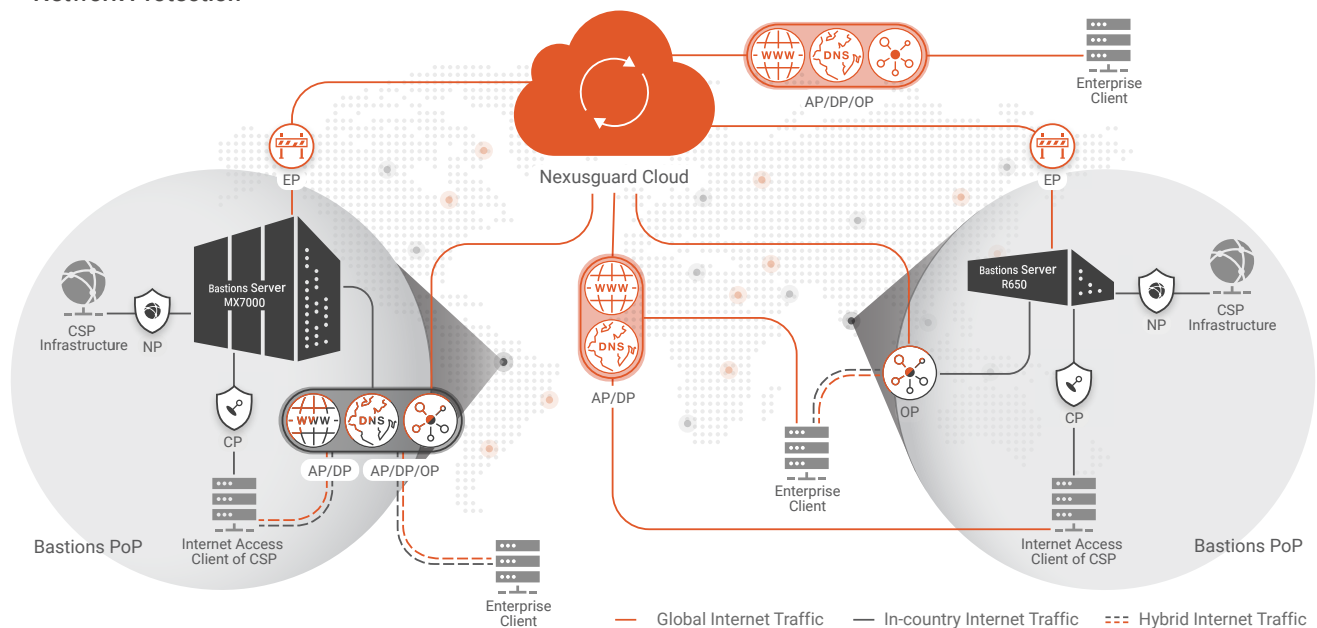

Productization and Partner Enablement
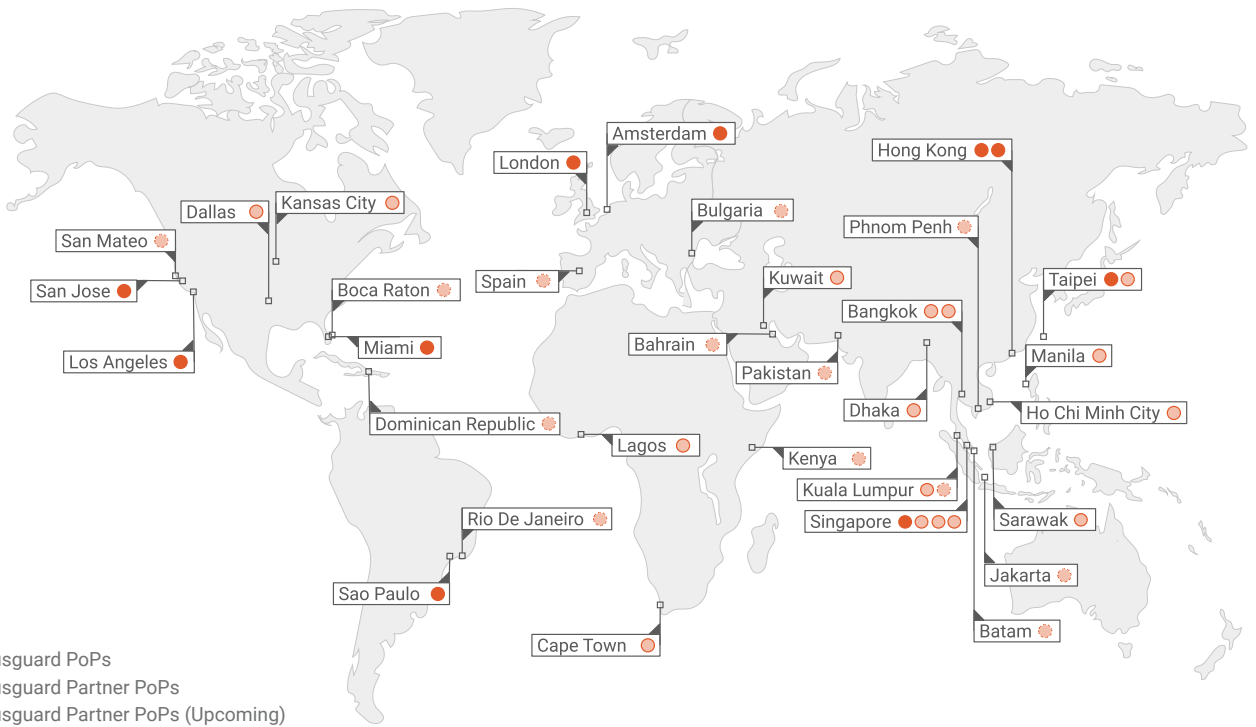

Transformational Alliance Partner (TAP)

The TAP program provides customized, cost-effective DDoS protection solutions for CSPs, protecting the core infrastructure while meeting customer demand for comprehensive DDoS protection.

- Application Protection
- Clean Pipe
- DNS Protection
- Origin Protection

Nexusguard Academy

Courses created and delivered by practitioners to equip your staff with real-world, executable skills and knowledge to lead your organization on its part of transformation and towards success.
