

About Parasoftware

Parasoftware provides innovative tools that automate time-consuming testing tasks and provide management with intelligent analytics necessary to focus on what matters. Parasoftware’s technologies reduce the time, effort, and cost of delivering secure, reliable, and compliant software, by integrating static and runtime analysis; unit, functional, and API testing; and service virtualization.

Parasoftware supports software organizations as they develop and deploy applications in the embedded, enterprise, and IoT markets. With developer testing tools, manager reporting/analytics, and executive dashboarding, Parasoftware enables organizations to succeed in today’s most strategic development initiatives — agile, continuous testing, DevOps, and security.

Highlights

- Founded in 1987, Privately held
- 300+ employees worldwide
- Headquarters in Monrovia, CA (USA)
- 30+ patents in software technology
- Over 8000+ customers worldwide
- Partnered with DerScanner to support more languages
