

## Perennial Consultancy Profile

### Overview:

We are a Singapore-based consultancy firm, established in 2014, with core focus on Web Penetration and Performance testing, as well as infrastructure consulting. On the Cloud front, we provide AWS consultancy and are a trusted JumpCloud (Cloud based Identity Access Management) reseller. For on-premise solutions, we specialize in delivering tailored virtualization systems such as Proxmox (a cheaper option to VMware).

### Services:

- **Web Penetration Testing**
  - Simulated cyberattack against your web application to identify vulnerabilities that could be exploited by hackers.
- **Web Performance Testing**
  - Evaluates how your Web application behaves under various scenarios and conditions, such as different user interaction and load levels, to ensure it operates efficiently and reliably.
- **Cloud Solutions**
  - Design and set up AWS cloud environment tailored to your specific needs. From initial architecture planning to deployment and cost optimization, we ensure your AWS infrastructure is secure, scalable, and aligned with your business goals.
- **On-Premise Solutions**
  - Specializing in setting up high availability and virtualization on-premise solutions tailored to your needs. Virtualization solutions we offer includes VMware, HyperV and Proxmox.

### Certifications:

- CISSP (Certified Information Systems Security Professional)
- CRT (CREST Registered Penetration Tester)
- CEH (Certified Ethical Hacker)
