OUR SERVICES

INTfinity Consulting strives to provide you with a comprehensive review of your cyber "health status", identify issues within your network, and develop solutions to rectify these vulnerabilities. This will not only help reduce your attack surfaces but also protect your systems and networks against unauthorized exploitations.

INTfinity Consulting also offers Reputational Due Diligence services, which are essential for companies to identify and assess all probable risks before entering into a business relationship with any prospective supplier, client or partner.

Consultancy

We will assess your current cyber-health, quantify your risks and provide tailored recommendations to strengthen your organization's cyber resilience.

Digital Forensics & Incident Response

We will help you reinstate your business operations in the safest and swiftest way, using our best-in-class digital forensics technologies and best practices.

Proactive Defences

We will conduct adversarial attack simulation exercises to provide a holistic view of your organization's resilience against real-world cyber attacks.

Reputational Due Diligence

Be sure that you are dealing with a legitimate counter-party with clear records. We conduct due diligence vetting utilizing OSINT tools and our global network to obtain crucial on-the-ground information.

ABOUT US

Locally established, INTfinity Consulting has Cybersecurity expertise and experience in both the public and private sectors. We believe in providing consistently high standards of services with efficiency and professionalism.

Our team has decades of experience within the Cybersecurity industry in Singapore and overseas. INTfinity Consulting can provide full support to enhance your Cybersecurity defences and ensures that your organization remains compliant with regulatory requirements.
