About Momentum Z

At Momentum Z, our DNA comes from the defense industry. We are aligned to the national agenda in cybersecurity and data protection measures at each of the three stages of growth for SMEs in the Digital Economy. As a partner in the CSA/IMDA programs, we offer comprehensive consultancy services including Cyber Essentials, Cyber Trustmark, Data Protection Essentials and Data Protection Trust Marks, ISO27001, and other cyber-risk management. Our mission is to help you navigate the complexities of cybersecurity, ensuring your business remains secure and compliant.

We leverage our expertise to offer a seamless experience, from initial consultation to implementation and ongoing support. Our team is dedicated to helping organizations achieve optimal security posture with minimal hassle.

Shane Chiang,
Co-founder and CEO

Our Proven Expertise in Cybersecurity and Data Protection

1. **Cyber Breach Response:** A significant 30% of our clientele have experienced cyber breaches. In these critical situations, we've provided comprehensive forensic analysis, effective mitigation strategies, and established robust cybersecurity infrastructures to safeguard against future threats.
2. **PDPC Breach Management:** We specialize in supporting organizations through PDPC breaches and subsequent regulatory reviews, navigating the complexities of compliance and rectification.
3. **Financial Institutions Security Testing:** Our Red Team engagements for financial institutions are designed to simulate sophisticated cyber-attack scenarios, testing and enhancing the resilience of their security measures.
4. **Certifications:** We have successfully guided numerous organizations in achieving certifications such as Data Protection Essentials, Cyber Essentials, and the prestigious Cyber Trustmark and Data Protection Trust Mark, demonstrating a commitment to best practices in data protection.

Momentum Z Own Certifications: ANNEX A

- **Cyber Essentials** – Certificate Number: MZT 2206038 C001

Momentum Z Featured on CH8's Coverage on New Cybersecurity Licensing Framework by CSA

Momentum Z was featured on Singapore's Channel 8 with Cyber Security Agency of Singapore on Cybersecurity Licensing Framework for cybersecurity providers. Our CEO, Shane Chiang, shared about the importance of Vulnerability Assessment and Penetration Testing (VAPT) which is a broad range of security assessment services designed to identify and help address cyber security exposures across an organisation's IT estate, website, mobile application. In simpler terms, we help to look for gaps where a malicious threat actor might take advantage of to breach your network or applications to steal the data, or to plant a malware. Email to info@mzt.one to find out more.

The Cyber Security Agency of Singapore (CSA) has announced the launch of its licensing framework for cybersecurity service providers under Part 5 of the Cybersecurity Act (CS Act). The licensing framework will take effect from 11 April 2022. Part 5 of the CS Act and the Second Schedule to the CS Act will both come into force on the same day.

Strengthening Trust with Data Protection Essentials

Trust is paramount in the mortgage brokerage sector where sensitive personal data, such as financial information, are required for brokers to facilitate loan applications. It is imperative that proper measures are in place to safeguard customers' data. Find out in this article how a small-medium enterprise (SME) managed to build trust with their clients by strengthening their data protection practices with the [IMDA's Data Protection Essentials \(DPE\)](#) programme.

In the modern digital economy, companies are harnessing the power of technology to enhance their customers' experiences and increase efficiency through improving processes. Insurance companies for example, allow individuals to "self-serve" online which grants them more autonomy and speed in service instead of having to waiting for a sales representative to be available or having to adhere to business hours. Banks too, are leveraging chatbots to provide immediate assistance to their customers without the need for physical banking.

Priding itself as Singapore's first mortgage fintech platform, [IQRate's](#) core business includes providing home loans and specialised advice on mortgage matters for its clients. For them, they have observed a notable shift in the demographics of home buyers, who are getting younger and are generally more tech-savvy with a preference towards using apps to meet their needs. One other pain point that often come up amongst their clients is the complexity that can come with mortgage brokerage.

By creating their own mobile application, IQRate enables their clients to "self-serve" and instantly obtain necessary information, such as the best home loan rates in Singapore or how to earn cash rewards, without the hassle of comparing rates across multiple banks.

"By employing technology, we aim to break down barriers and make it more convenient for our clients." - Ms Angeline Eng, Founder and Director of IQRate.

STARTING OUT RIGHT WITH THE DATA PROTECTION ESSENTIALS

IQRate first heard about the [Data Protection Essentials \(DPE\) programme](#) by word-of-mouth, and was then introduced to [Momentum Z](#), one of IMDA's approved DPE service providers. According to Momentum Z's Co-founder and Chief Executive Officer Mr Shane Chiang, what made the DPE attractive was that "it was developed by a government agency, and therefore IQRate was assured that it would be credible".

While IQRate believes that they have the right data protection practices in place, they were unsure if that was sufficient. They saw potential in documenting their practices in a systematic way to ensure they do not miss out any critical steps that would put their clients' personal data and their reputation at risk. "We are just not sure how to do this and needed someone with the right expertise to guide us," explained Ms Angeline Eng, who double-hats as IQRate's Data Protection Officer (DPO).
