About Us

Founded in 2002, NetGain Systems is a pioneer in the IT monitoring business, and continues to develop its business as it evolves from IT monitoring to IT observability. It has established local teams throughout the Asia Pacific Region, including Australia, China and Singapore.

Regardless of location, type, size, or complexity, our solutions give our customers the power to observe their IT infrastructure, services, applications and devices with ease, all from a single management dashboard, to achieve operational excellence with reduced complexity and gain useful insights to improve business outcomes.

By understanding that every organization's IT environment is different, NetGain's dynamic solutions are designed to be uniquely adaptable, fitting the unique demands of your operating environment and evolving with your growing organization.

Why NetGain

Unified

Single location, multiple branches, on-prem and hybrid, all deployments are supported. Single console for full observability.

Easy To Use

Designed for enterprises with a small IT Ops team. Easy to deploy and operate. No programming required.

Customizable

Dashboards, alarms, notifications, reports are all customizable. If you need more customization, come talk to us.

Cost Efficient

Full-featured automated solution in the market that helps optimize enterprises' capabilities, and improves the value provided to customers.

Social
