Core Values

Our core values govern our company mission and operations. **Practical Security** - we are committed to provide our customers practical security recommendations that are inline with industry best practices to achieve operational balance and meet their IT security needs. **Service Excellency** - we deliver projects with efficiency and quality, and to the utmost customer satisfaction. **Nurture and Contribute** - as part of the local cyber security community and a social enterprise, we nurture talents and build a respectable elite workforce that contributes to a stronger and safer cyber society.

Strength and Focus

Our key differentiators are on cyber security, *web and mobile applications security* and *secure coding*. By being forefront in security technology and development, we are able to help organizations develop capabilities to embrace overall security within their business needs and entire application life cycle. Our approach to practical security has created a pool of returning customers who adopt our advice and confide in us with our unparalleled services and profound experience.

Services Coverage, Accreditation & Professional Certifications

We offer a wide range of security consulting services. This ranging from penetration testing and vulnerability assessment on system, network, mobile, cloud and application, to IT and cyber security risk assessment and management, audit and review, to incident response exercise and specialised security training, and to various aspects of security resiliency preparedness, development and advisory.

Our company and security consultants hold these accreditations and professional certificates, complemented with vast and deep project experiences to service and deliver practical security for our clients.

Operations
