PastelOps

Company Profile

Who Are We

PastelOps is a cybersecurity consulting firm incorporated in Singapore at the start of 2019. We specialise in helping organizations to secure their systems and data through our security advisory work, vulnerability assessment and penetration testing services, code review services and more.

Our team consists of professionals who have numerous years of experience delivering quality cybersecurity services to clients such as large enterprises, public sector, and small and medium companies.

PastelOps is committed in helping our clients solve their cybersecurity challenges in the modern digital economy so they can concentrate on what they are best at.
