Overview of AEGIS Security

Who We Are

Residing in Singapore, we are a digital security company that works with the local government and private companies.

Our mission is to support our clients, and secure their systems against potential threats through pre-emptive measures, such as security assessments, and cutting-edge solutions to cutting-edge security challenges.

Our Services

AEGIS Security is a digital agencies that specialise in providing the following digital solutions:

- **Application Vulnerability Assessment**
- **Network Vulnerability Assessment**
- **Penetration Testing**
- **Source Code Review**
- **Configuration Review**

With our vision of becoming the best in our line of business in the long term, we aim to attain the highest possible standard in all of our services. Including the security part. We do not just strive to meet our clients' requirements in terms of system availability and user experience; we also strive to make it safely and securely.

Why Choose AEGIS Security

Quality and Security Standard

AEGIS Security is committed to quality and security standards and familiar with the Government Security Standard (IM8).

Government Security Standard (IM8)

AEGIS Security has extensive familiarity with Govtech's stringent security standard, IM8, which stands for Instruction Manual 8. This familiarity stems from our ongoing operation of their cloud platforms and our successful completion of numerous application development projects in collaboration with them. Our team's deep understanding of IM8 and our proven track record in adhering to its requirements underscores our commitment to maintaining the highest levels of security and compliance in all our endeavors.

Personnel Security Certifications

Our dedication to security extends beyond the organizational level; it permeates through every member of our team. We take pride in the fact that our personnel are not just experienced but also certified in various security disciplines, such as:

- Certified Information Systems Security Professional (CISSP),
- Certified Information Systems Auditor (CISA),
- CREST (Certified Security Tester), and
- Certified Ethical Hacker (CEH).

Figure 1: Personnel Security Certifications

These certifications reflect our team's unwavering commitment to staying at the forefront of industry best practices and ensuring that our clients' data and systems are safeguarded against evolving threats.

Solid Success Track Records

AEGIS Security has strong track records in the successful development and security testing of Singapore government projects. AEGIS Security has the know-how and experience in helping government clients build strong cybersecurity solutions and achieve successful project outcomes. Our past security testing projects include:
