AN ACCREDITED CREST MEMBER

- Council of Registered Ethical Security Testers
- CREST is an international not-for-profit accreditation and certification body that represents and supports the technical information security industry
- This accreditation empowers our clients with the confidence that:
 - We have a demonstrable level of assurance that we will provide clients a robust assessment of their information security posture.
 - Our penetration testing services will be carried out by qualified individuals with up-to-date knowledge, skills and competence, supported by a professional services company with appropriate policies, processes and procedures.

OT SECURITY

FIRMUS provides OT Security Assessment services which address your OT security risks and helps you define OT security concerns from design to operations.

ICS & IIOT SECURITY ASSESSMENTS

- Security Posture Assessment (SPA) and/or Risk Assessments based on international and local standards
 - IEC 62443:2018
 - NIST SP 800-53
 - NIST SP 800-82
 - NIST CSF
 - CSA's CCoP
- Vulnerability Assessment
- Intelligence-Led Penetration Test

OT COMPLIANCE ASSESSMENTS

- Singapore CSA CCoP
- Internal Security Policy
- Local regulator security guidelines
- IMO 2020

OT SECURITY CONSULTING

- Consultancy based on international and local ICS/SCADA/OT standards
- Risk Mitigation planning (security architecture design and review, process review)
- Awareness Training

AWARENESS

At FIRMUS, we have a sophisticated SaaS platform that enables organizations to provide cyber security training for their employees at the click of a button.

We offer many cyber security awareness topics that range from password security to malware, ransomware, and more. Using the SaaS platform, employers can run security awareness campaigns to consistently educate employees periodically, efficiently and effectively. Comprehensive reporting coupled with monthly engagements enable clients to have clear control and visibility of their employee's security awareness levels.

WHY MANAGED PAM?

End-to-End Solution

- Deliver end-to-end accountability and management
- Product licensing for PAM Privilege Cloud
- Strategic planning and solution design
- Technology installation and deployment
- 24/7/365 incident response

Scalable Solution

Achieve agility through a managed model that is designed to scale and expand

Faster Time to Value

Roll out of technology solutions quickly and easily to maximize your investment

Continuous PAM Improvement

Mitigate risks, improve efficiency and address compliance by enhancing your PAM maturity over time

Reduced Operational Costs

Eliminate manually intensive and time-consuming administrative processes so that your internal teams can focus on other priority projects

Agile Change Management Best Practices

Reduce objections, improve adoption and fully realize the benefits of your PAM technology investment.

Ongoing Management by PAM Experts

24/7/365 management of the PAM program by skilled experts working from highly secure facilities around the globe.

OUR CLIENTS ARE OUR TREASURED JEWELS

Since its inception in 2008, FIRMUS has demonstrated unwavering commitment in keeping our clients' businesses secured. Joining forces with the world's leading cyber security technologies, our skilled resources have helped many clients weather the toughest cyber security threats and put breaches to a stop. By conducting ourselves professionally, upholding ethics and integrity, FIRMUS has earned the trust of clients, regulators, and the public. Trust is our single most important responsibility – the reason we do what is right, always.
