Preventing Cyber Thefts, Securing Businesses – **Cybersecurity Services**

Cybersecurity Audit

- ✔ Standard Security Audit as per the OWASP Application Security Verification Standard (ASVS) & Mobile Application Security Verification Standard MASVS
- ✔ Full-scope infrastructure assessment
- ✔ Vulnerability scanning and analysis based on latest guidelines & compliances
- ✔ Extensive penetration testing
- ✔ Customised security report with actionable insights
- ✔ Post-assessment support and consultation on identified issues

Cybersecurity Patch

- ✔ Audit based identification of vulnerabilities through threat intelligence on OWASP based standards
- ✔ Immediate deployment of critical patches
- ✔ Customised patch management for specific software and platforms
- ✔ Advanced vulnerability analytics and reporting
- ✔ Latest patch deployment support per audit & resolution cycle
- ✔ Compliance-focused patch management via customised tailored aspects to suit your business needs (e.g., HIPAA, DPDPA, PCI-DSS, etc.)

360 Degree Cybersecurity

- ✔ Threat intelligence integration for proactive defense
- ✔ Continuous compliance monitoring and reporting
- ✔ 24/7 incident response support
- ✔ Customised security awareness program with regular updates
- ✔ Latest patch deployment support
- ✔ Regulatory compliance management (e.g., DPDPA, PCI-DSS)
- ✔ Includes services like Antivirus, Firewall, WAF, PHP Security Layer, Patch Management, Domain Reputation, etc. with applicable T&Cs

Licensable Cybersecurity Services

Manages security operation center monitoring service

A team of IT security professionals that monitors your IT infrastructure, 24/7, to detect cybersecurity events in real time and to respond promptly to them in order to prevent or limit the risk of a cybersecurity attack.

Penetration testing service

A form of ethical cybersecurity assessment to identify vulnerabilities affecting your computer networks, systems, applications and websites so that weaknesses discovered can be mitigated to minimise the risk of malicious hackers exploiting them.
