277

days is the average lifecycle to identify and contain a breach

- *IBM, 2023*

66%

percent of organizations were hit by ransomware in the last year

- *Sophos, 2023*

Cybersecurity & data protection are key areas of growing concern for businesses and individuals.

- Companies that focus on security best practices can better protect their data and assets from financial, legal and reputational risks.
- Whether you're a small business, large corporation or non-profit organisation, it is important to have an effective cybersecurity strategy in place.
- Secure your digital and data assets for greater peace of mind.
- **At TRS, we synergise our expertise in cybersecurity, data protection and digital forensics to protect organisations and individuals against system vulnerabilities while empowering business growth.**

Our core competencies & 3 service pillars:

Cybersecurity

Protect systems, networks, data & programs from cyberattacks

Digital Forensics

Investigate irregularities & gather evidence with our expertise

Data Protection

Safeguard confidential info & personal data in your possession

We are a trusted consultancy with a stellar track record accomplished through our consistent application of best practices in cybersecurity and data protection.

The TRS Advantage

We are the only cybersecurity and data protection service provider to have attained all 3 certifications awarded by IMDA - the Data Protection Trustmark (DPTM), APEC Cross-Border Privacy Rules System (CBPR) and APEC Privacy Recognition for Processors (PRP) Certification.

We have attained the highest Tier in Cyber Trustmark Certification (Advocate Tier) awarded by CSA.

It serves as a mark of distinction to recognise the commitment of TRS towards cybersecurity excellence and acts as proof of our stellar track record in identifying and mitigating cyber risks, and handling forensic investigation cases.

Headquartered in Singapore with operations also in Malaysia, China and Indonesia, our cohesive team is made up of certified veterans with extensive experience and younger talents who are passionate about the latest industry developments.

We have also been listed by IMDA as consultants for Data Protection Trustmark (DPTM) and by CSA for Cyber Essentials (CE), Cyber Trust (CTM) and Chief Information Security Officer-as-a-Service (CISOaaS).

Our consultants are able to evaluate your organisation's needs, offer pre-consultancy insights, discuss government funding options, and help you prioritise your cybersecurity goals.

Our Awards

- TRS was awarded the *SME Cyber Security Excellence Award 2023*, which was launched by the Association of Trade and Commerce (ATC) and supported by the Cyber Security Agency of Singapore (CSA) under the SG Cyber Safe partnership programme.
- The award recognises TRS for having implemented cybersecurity measures and adopting cyber safe approaches in our business processes.

Our Clientele
