Security Services

Technoally

Singapore | Malaysia | India

About Us

Technoally was founded by Technopreneurs with experience in IT field of more than two decades. Technoally entity was formed to focus on Cloud solutions & Managed service for customers. We are young and dynamic company with consultant's collective experience of over 30 years to do consultative selling.

We have come a long way in providing Technical Support and Integration Services to the customers with on premise IT HW/SW infrastructure. While we continue to do that, we would value add it with managed service to existing and new customers. We have also streamlined and progressed to provide the latest HW/SW and other solution along with networking products on the cloud. Customers need not invest upfront in purchasing an expensive HW/SW to use it for 5 years and do a tech refresh again. Technoally's managed service helps customer to operate their whole IT infrastructure with minimal or no IT personnel in house.
