Cyber Security

For the Financial Industry

— ABOUT BARE COVE TECHNOLOGY —

Bare Cove Technology (BCT) is a Singapore based consultancy and solutions provider. Our team is made up of proven leaders in the fields of cybersecurity, software development, cloud technologies, and IT infrastructure and design. We support financial firms across the Asia Pacific region, helping you to protect your business and to meet the evolving expectations of institutional investors and global regulators.

PENETRATION TESTING

The best way to stop a hacker is to think and act like a hacker. BCT will simulate malicious threat actors and validate your security defences, with customized attack methods designed for each client.

VULNERABILITY ASSESSMENT

You can't fix the flaws you can't see. BCT will scan your internal and external networks to provide you with a comprehensive view of where your security threats come from.

TECHNOLOGY AUDIT

Regulation matters. BCT provides independent third-party technology reviews to assess your infrastructure and ensure your technology stack meets the expectations of global regulators and institutional investors.

SECURITY TRAINING

A culture of security is crucial. BCT will present online and onsite security awareness training for your team. BCT also delivers phishing and vishing campaigns to continuously improve employee behaviour.

SECURITY POLICY DESIGN

Cyber policies are now a top priority for investors. BCT provides documentation design and review services for your security policies and procedures, and assists you in fulfilling your regulatory compliance.

OPEN SOURCE INTELLIGENCE

You are only as secure as your weakest link. BCT performs an intelligent search based on your personal profile to assist you in understanding how your historic cyber footprint might be tracked by others online.
