# *Background*

AtomIT Networks established itself in 2002 as a System Integrator dispensing *Network Infrastructure-related and Network Security-related* products, solution and technical support services:

- Offering expert deployment (Network Infrastructure and Network Security)
- Providing Product fulfillment and Technical Advisory Services
- Servicing via Maintenance and End-of-Life (EOL) Management
- Delivering Technical Planning and Implementation Services

It is our belief that a successful IT strategy gives businesses a much needed competitive edge. Our highly motivated and skilled team will play an integral part in offering solutions that align with customer's business objectives.

AtomIT Networks is in the business promoting Business Contingency and Managed Security Services.

Methodology

AtomIT Networks realizes the importance of good partnership and excellence in customer relation management. As such only products having undergone stringent evaluation and testing by our technical team would be recommended to our customers.   As such we are selective of our business partners and have common understanding of what is to be expected to derive mutual benefits.   As for our customers, we advocate solutions that must first be beneficial to their business operations before anything else.

- Establishing relations with key vendor and their representatives
- Practicing a proven engagement methodology
- Understanding customer's business challenges
- Knowledgeable in the solutions we recommend to customers

AtomIT Networks has also developed its own unique project management workflow (from Design to Build Stages) to ensure clarity in responsibilities and engagement check-points that is now part of our standard operating procedure

Design Stage

1. Requirement Gathering
2. Study Existing Network Design
3. High Level Design
4. Low Level Design

Build Stages

1. Planning: Implementation & Migration
2. Staging
3. Support: Implementation & Migration
4. Readiness for UAT (User Acceptance Test)

PROJECT **MANAGEMENT**

Summary

AtomIT Networks is the preferred IT partner to many organizations across various industries and segment. We deliver strategic high-value Infrastructure and Security Technology Services and Solution to overcome customer's challenges in business IT operation. We also manage the lifecycle of these IT investments to optimize the availability and quality of service that the customer is able to utilize.

OUR **MISSION**

Strive to **add value** to our customers through
our professional solutions and services using advanced
ICT technologies.
