

Employees are one of the biggest threats in cyber security.

**More than 90% of attacks start with an email.**

*Cybercrimes do not target big businesses only.*

## iCYBERWISE

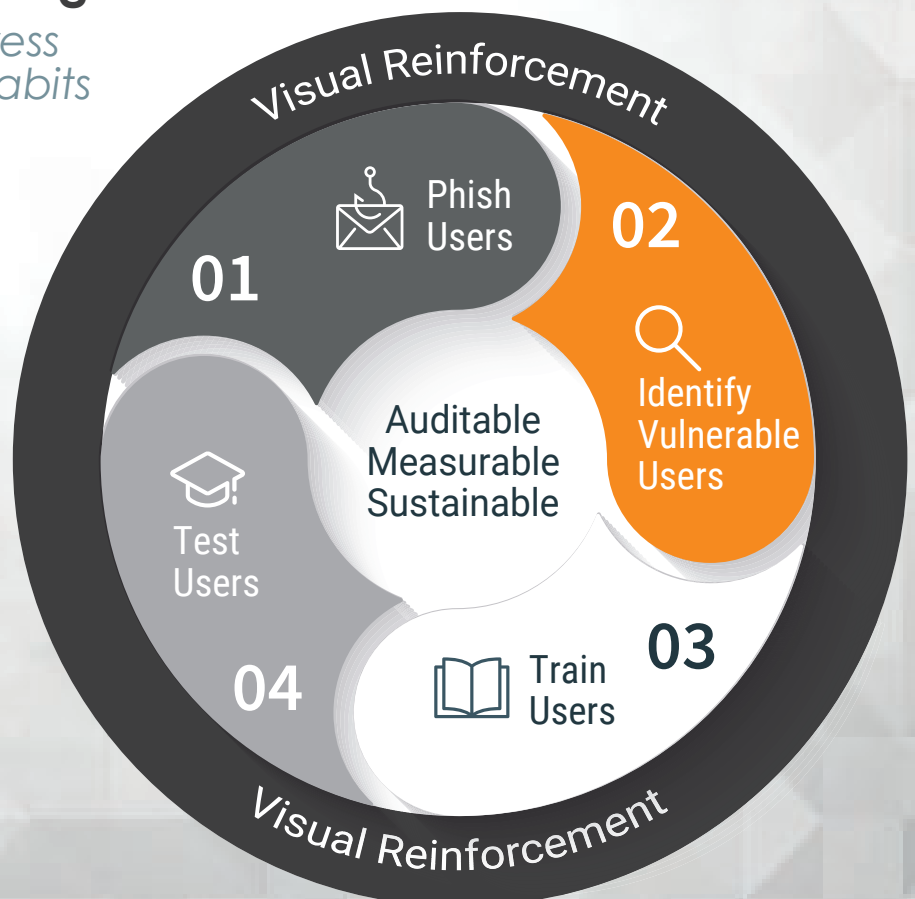

### Holistic Cybersecurity Programme

*Companies need to address safe cyber behaviour & habits among employees*

Training employees once a year is insufficient as a shift in behavior requires a holistic programme over a period of time.

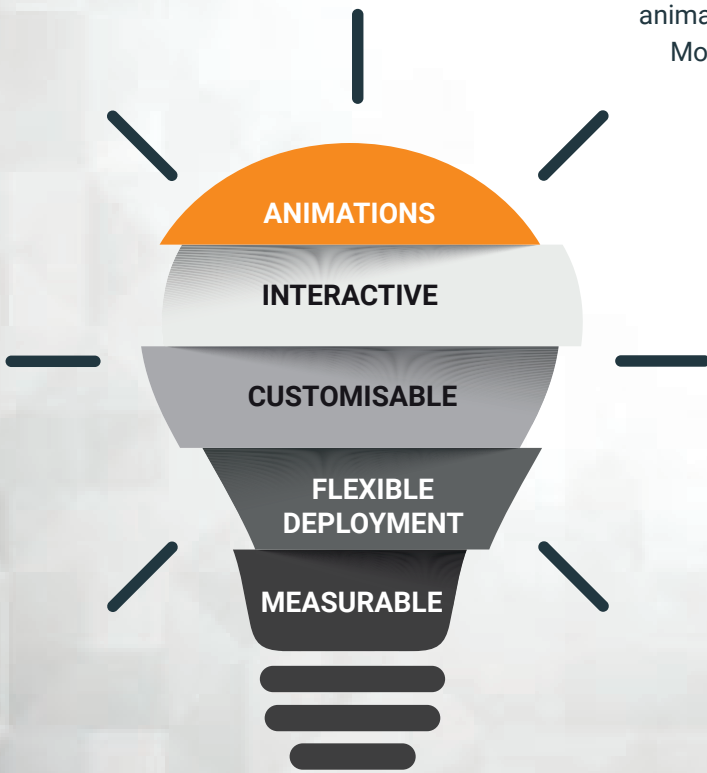

The iCyberwise holistic programme by **Graystone International** offers medium to large businesses the chance to effectively strengthen their security at an affordable rate.

The programme content is also customisable to suit various businesses. With our tried and tested methods, we will ensure that your employees are ready to take proactive action against any cyberthreats.

# Bringing corporate learning to life!

*We pride ourselves on being different from others.*

## KEY FEATURES

### ANIMATIONS

Rather than boring text, we use educational animations to simplify and explain abstract concepts. Moving images help capture and sustain a viewer's attention and make learning more fun.

01

### INTERACTIVE

User interaction is required to complete the training, to maximise knowledge retention through active learning.

02

### CUSTOMISABLE

Depending on your requirements and environment, all our videos and content can be customised to suit your needs.

03

### FLEXIBLE DEPLOYMENT

We provide you the option of hosting the content in your own environment or with our cloud-based provider.

04

### MEASURABLE

All our programmes are auditable, measurable and trackable. This is important as it plays a critical role in evaluating your employees.

05
