

Simplifying Security, Privacy, and Compliance

FEHAGRC is a governance, risk, and compliance (GRC) platform that simplifies how organizations manage security, risk, and compliance. It replaces manual compliance work with structured, automated processes, ensuring continuous audit readiness and stronger security.

FEHAGRC is already **trusted by active, revenue-generating clients** across multiple countries, such as the United States, United Kingdom, Germany, Singapore, and Australia. This demonstrates real market demand and proven value, with adoption from organizations operating in diverse regulatory and business environments.

Our Solutions

Framework Management

Manage multiple standards efficiently with AI-driven control mapping and guidance.

Internal Audit

Simplify internal audits with AI-assisted evidence review and clear recommendations.

Risk Management

Track and remediate risks centrally, aligned with security best practices.

Vendor Management

Assess and manage vendor security and privacy risks with AI-driven insights.

Monitoring Device Management

Monitor device health to keep systems and configurations secure and up to date.

Website Vulnerability Scanner

Identify website vulnerabilities with actionable reports and prioritized remediation.

Framework Coverage

- FEHAGRC supports **both global standards and local regulations**. For global standards, this includes ISO 27001, ISO 9001, PCI-DSS and SOC 2. FEHAGRC also supports various local regulations, including UAE PDPL, Qatar PDPL, Egypt Data Protection Law, Saudi Arabia PDPL, UK Cyber Essentials, CSA Cyber Trust, Singapore PDPA, and Indonesia UU PDP.

FEHA

GuardRisk.

AI Assistant for GRC Professionals and Auditors

GuardRisk is an AI assistant that **frees** GRC professionals and auditors from **manual busywork**. Covering a wide range of **international and local regulations**, it handles **tedious routine tasks** and compliance workflows with **precision**. This enables teams to shift focus **from spreadsheets to strategic**, high-impact work—reclaiming valuable time and resources while staying ahead of evolving regulatory demands.

Our Solutions

Ask & Interpret Regulations

Answer compliance questions and interpret security and privacy requirements in clear and practical language.

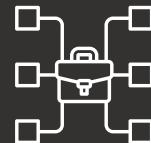

Measure Compliance Coverage

Measure how well existing evidence aligns with selected frameworks by calculating coverage percentages and identifying compliance gaps.

Review Evidence Automatically

Analysis of uploaded policies, procedures, and documents to reduce manual review and repetitive validation work.

Validate Controls and Documentation

Checks the consistency and alignment of controls, evidence, and documentation against applicable requirements to support audit readiness.

• Framework Coverage

GuardRisk supports both global standards and local regulations. Global standards include ISO 27001 and NIST-CSF, while supported local regulations include UAE PDPL, Qatar PDPL, Egypt Data Protection Law, Saudi Arabia PDPL, UK Cyber Essentials, CSA Cyber Trust, Singapore PDPA, and Indonesia UU PDP.
